Choosing an Effective Visual

- “There are many different graphs and other types of visual displays of information, but a handful will work for the majority of your needs” – Knaflic “Story telling with data”
- Choosing effective visual is as important as presenting the data / story
- Handful of visuals are typically used
 1. Simple text
 2. Table / Heatmap
 3. Scatter plot
 4. Line / Slopegraph
 5. Bar – Vertical/ Horizontal / Stacked
 6. Waterfall
 7. Square area

Design concepts

- Thinking like a designer – Product Design Philosophy – “Form follows function”
- What it is we want our audience to be able to **do with the data (function)** and then **create a visualization (form)** that will allow for this with ease
- Traditional design concepts can be applied to communicating with data
 1. **affordances,**
 2. **accessibility, and**
 3. **Aesthetics**
 4. Finally gaining audience **acceptance**

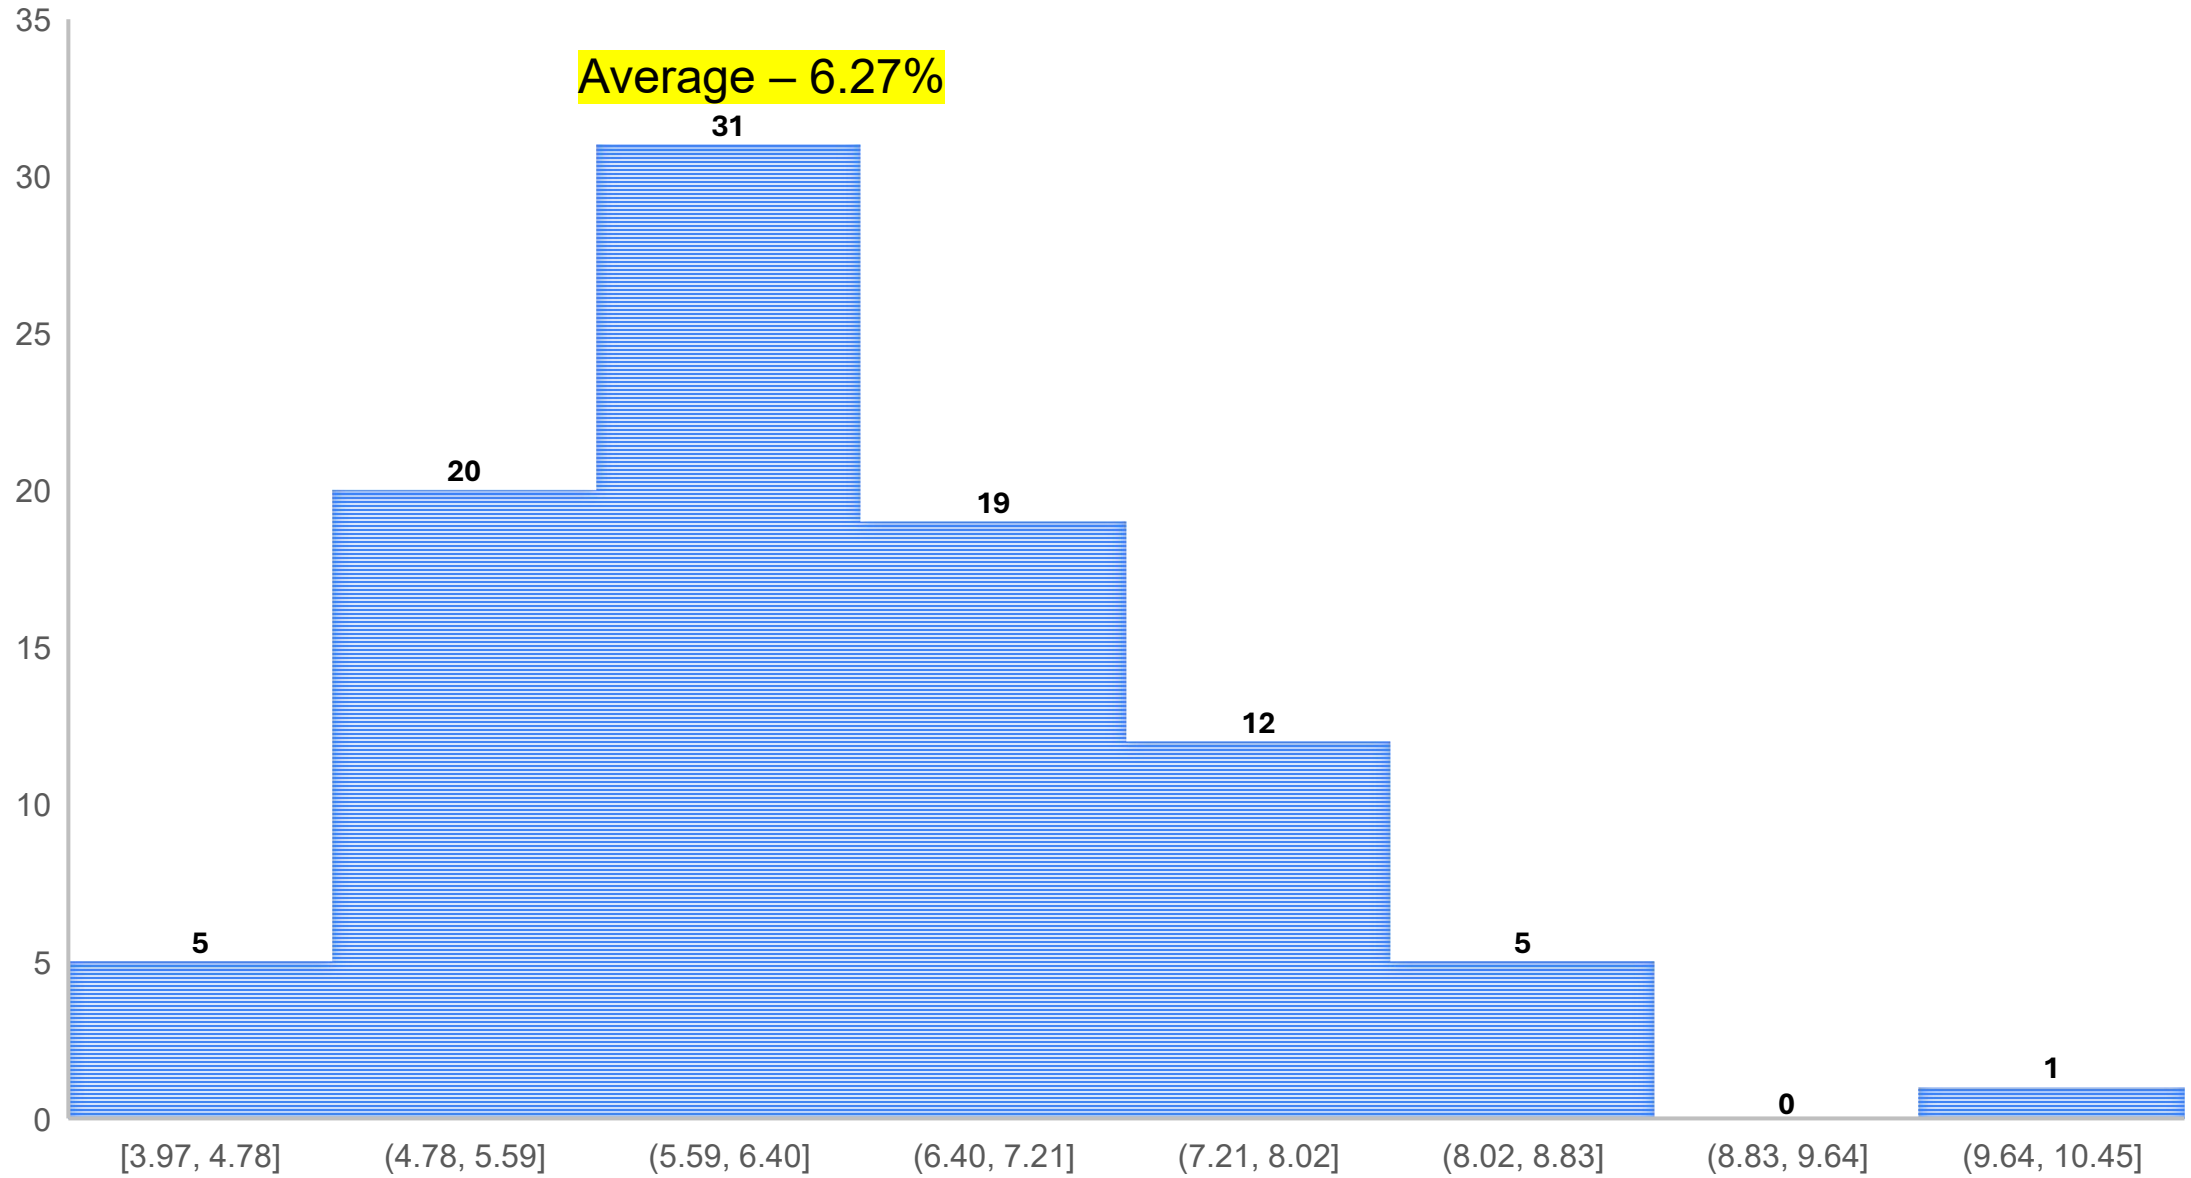

Different Types of Plots and Purposes

Method	Communication purpose
Comparing categories	Comparisons between the relative and absolute sizes of categorical values
Assessing hierarchies and part-to-whole relationships	Breakdown of categorical values in their relationship to a population of values or as constituent elements of hierarchical structures.
Showing changes over time	Temporal data and show the changing trends and patterns of values over time.
Plotting connections and relationships	Associations, distributions, and patterns that exists between multivariate datasets. Facilitating exploratory analysis
Mapping geo-spatial data	Datasets with geo-spatial properties via the many different mapping frameworks.

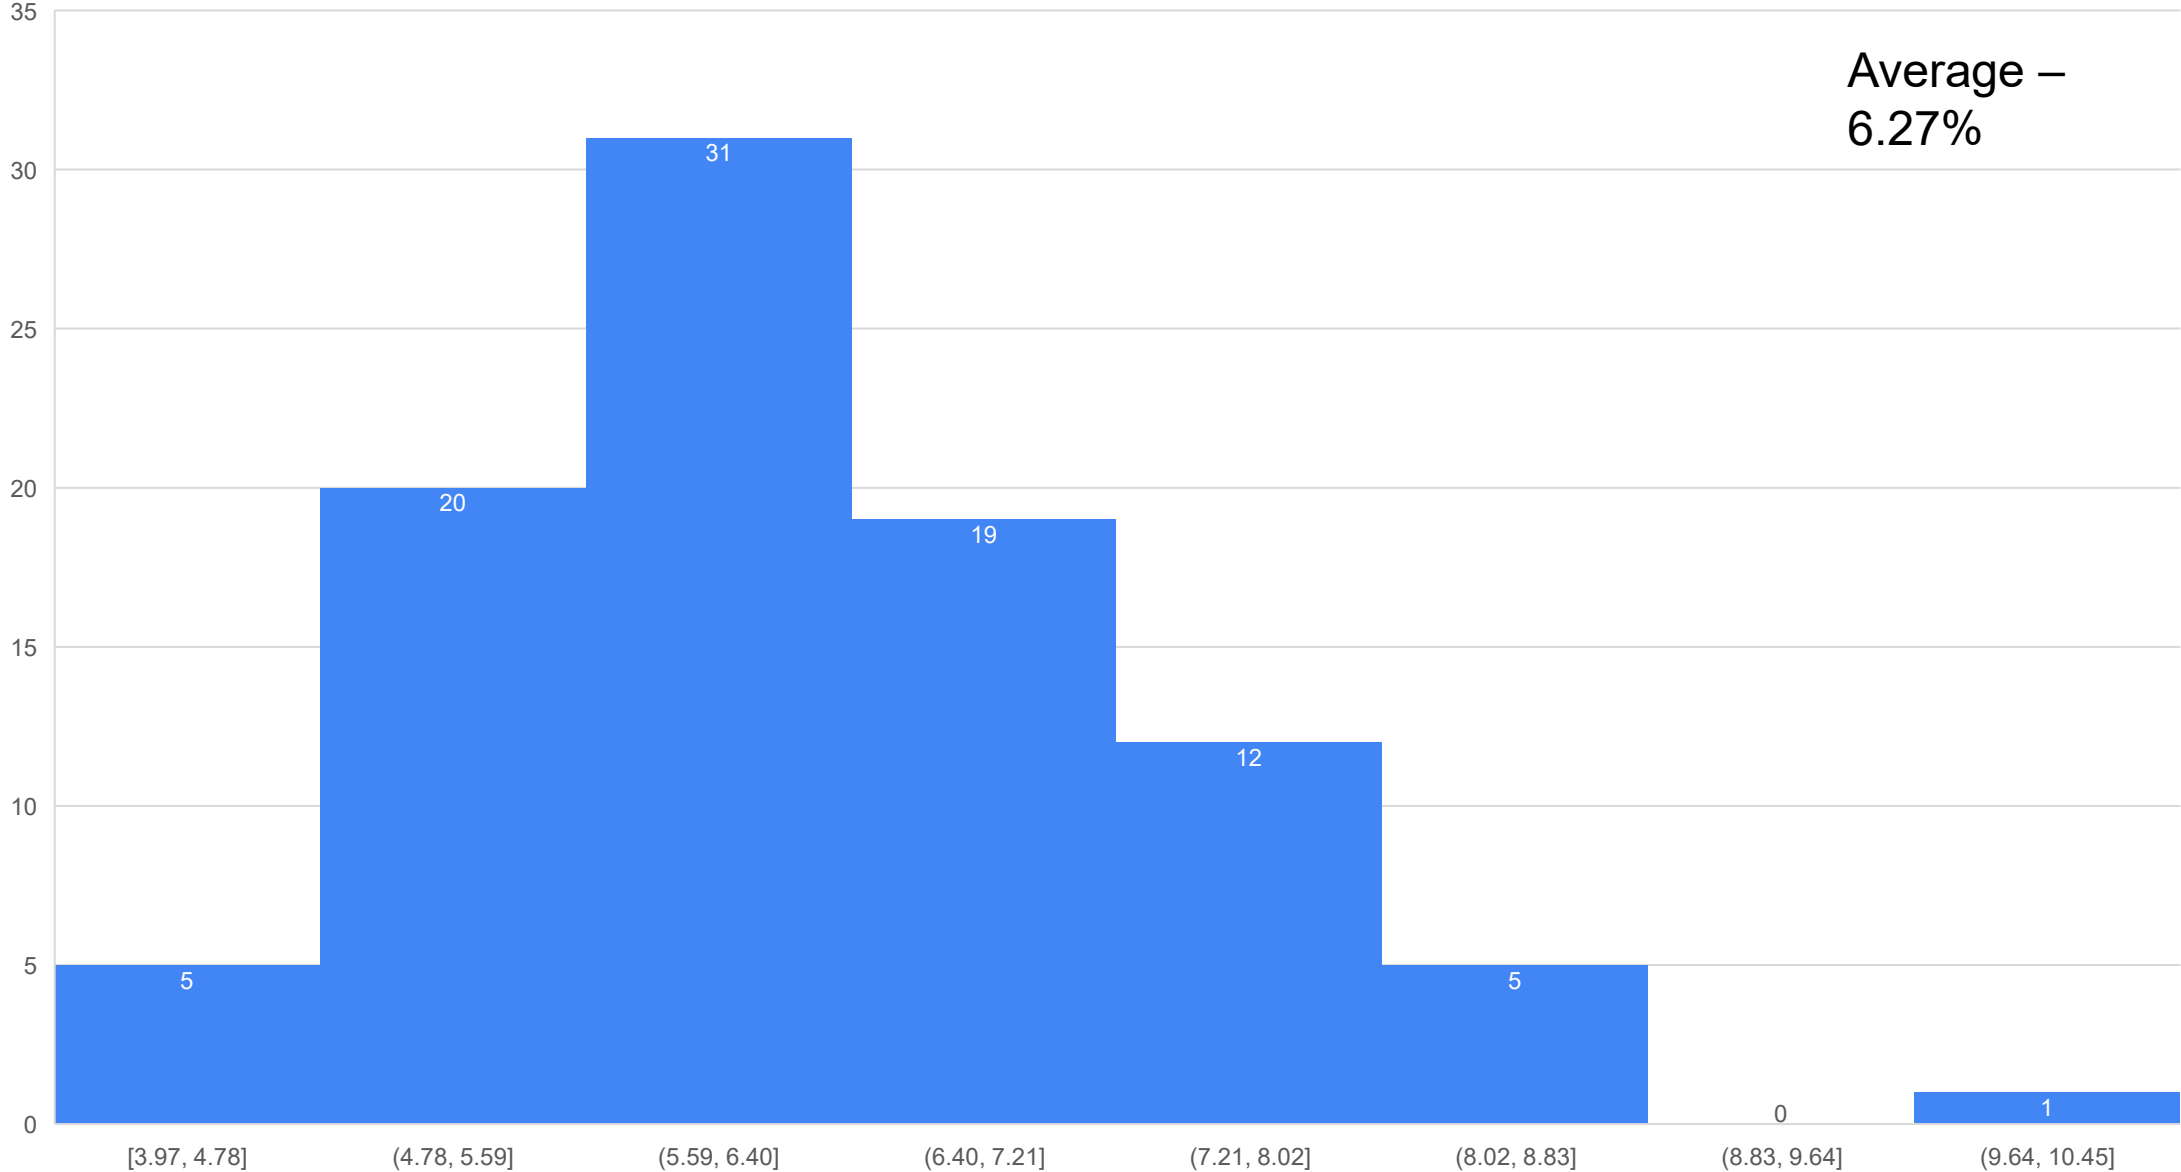

Industry Trends

Performance Ratios	ASCBs	PSBs	PVBs
Cost of Funds (annualized)	5.69	5.46	5.98
Yield on Funds (annualized)	8.45	8.10	8.99
Efficiency (Cost Income) Ratio	46.49	50.31	43.65
Overhead Efficiency Ratio	72.16	64.13	79.18
Profit Margin	14.20	11.76	16.40
Net Interest Margin (NIM) (annualized)	3.38	2.85	3.94
Return on Equity (annualized)	12.44	12.98	12.70
Return on Total Assets (annualized)	1.30	1.00	1.65
Operating Profit to Total Working Funds (annualized)	2.46	1.88	3.11
Interest Income to Total Income	83.19	85.63	81.23
Non-Interest Income to Total Income	16.81	14.37	18.77
Staff Expenses to Total Income	11.50	13.59	9.21

COST OF DEPOSITS

Cost of Deposits
